

## Joint Health For Pets - Product Information

### Joint Health For Pets

#### Help Your Pet Play Younger Longer

Contains Protectin™, Glucosamine Sulfate, MSM, CMO, Chondroitin sulfate, 19 Different Vitamins and Minerals, Bone Meal, Beef Liver & Maxcell™

#### Problem

The connective tissue in our bodies requires specific nutrients in order to stay healthy, and the same holds true for your pet. As our pets get older, their needs for nutrients to protect and support joint tissues increase, putting them at a greater risk for developing vitamin and mineral deficiencies. If left unchecked, this can lead to premature aging and poor healing of joint tissues--tendons, ligaments and cartilage.

#### Benefits:

- 1) Contains targeted nutrients for joint and connective tissue health
- 2) Provides Protectin™ to protect against catabolic "wear down" forces in the body
- 3) Includes Maxcell™, our patented bio-availability multiplier that helps increase nutrient absorption

**Most relevant for:** Older pets needing support for joint and connective tissues, and also extra vitamins and minerals.

#### Instructions:

Pets under 12.5 lbs: ¼ scoop daily, Pets 12.5 lbs: ½ scoop daily, Pets 25 lbs: 1 scoop, Pets 50 lbs: 2 scoops, Pets 75 lbs: 3 scoops, Pets 100 lbs: 4 scoops

#### Directions:

Sprinkle on food daily based on weight. Older pets showing signs of aging may be given twice the number of daily scoops for 5-7 days to achieve the desired response; then return to normal serving size.

#### Warnings:

Not for use in pets taking daily medications for long-term, chronic pain and inflammation, such as Rimadyl, Etogesic, Adequan Canine or Cosequin. Joint Health For Pets contains Protectin, an all-natural herbal extract that may exacerbate the side effects of those medications.

#### Supplement Facts

##### **Serving Size: 1 scoop**

Bone meal powder, 700mg per scoop  
Glucosamine sulfate, 300 mg per scoop  
MSM (Methylsulfonylmethane), 300 mg per scoop  
Beef liver powder, 350mg per scoop  
Chondroitin sulfate, 125mg per scoop
